

Close Digital Protection™

Gain Visibility of Exposure on the Dark and Deep Web

What is Dark Web Monitoring?

Dark web monitoring is the process of automatically, continuously and anonymously collecting data from hidden sources in the dark web. These sources include Tor, I2P, encrypted chats, hacker forums and many more.

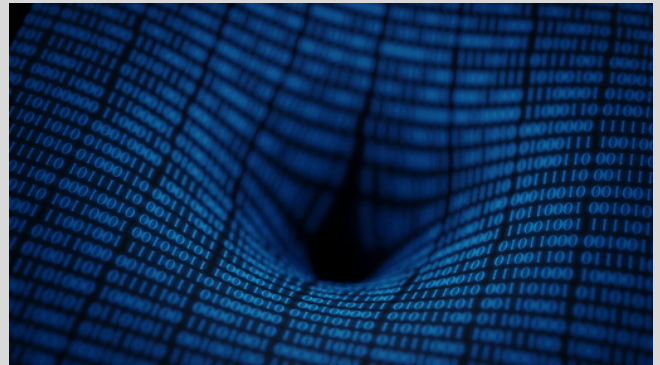

We index this information within our Close Digital Protection platform to provide you situational awareness and visibility of who is talking about you and your brand in the dark web.

Benefits of Dark Web Monitoring

- Assess you or your brands exposure in the deep and dark web
- Detect criminals and threat actors mentioning your name
- Prioritise actionable intelligence over noise
- Monitor and protect executives and persons of interest
- Never have to travel to the deep and dark web to see the data

Close Digital Protection™

We detect, monitor and investigate digital threats facing individuals, businesses, law enforcement and large enterprises with Close Digital Protection (CDP).

Deep Web Defined

The deep web accounts for approximately 90% of all websites. It consists of social media, forums, databases, news and blogs that are not indexed by standard web search engines.

The deep web is in between the surface web and the dark web.

Dark Web Defined

The dark web lies at the bottom of the iceberg. It refers to websites that are not accessible by normal web browsers.

The dark web is not indexed by Google or any main-stream search engine and required specific software and authentication.

The Dark Web is commonly used by threat actors to share and sell illicit information.

600,000,000+

Dark web pages from Tor, I2P, IRC, and ZeroNet.

500+

Authenticated dark and deep web sites from black markets, underground forums and chat rooms

150,000,000+

Pages collected from the deep web.

600+

Encrypted Telegram Channels.

100%

Consumption based intelligence;
scale up when you need

100%

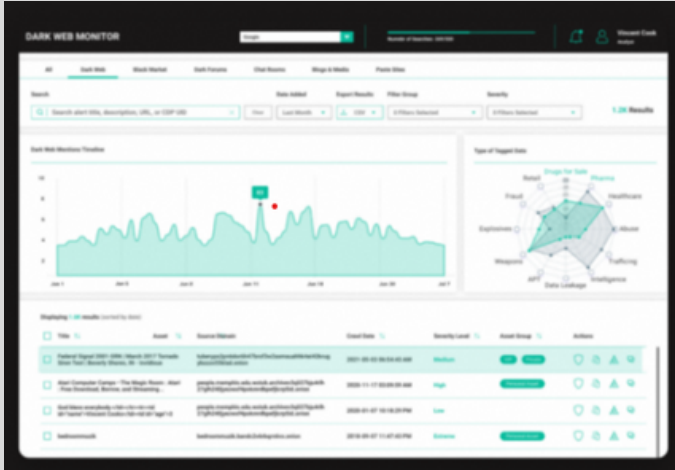

24 / 7 intelligence monitoring
across your entire digital footprint

150+

Integrations with data sources
and security technologies

20x

Faster threat discovery across
your digital footprint

Capabilities

- Continuous 24/7 Monitoring Dashboard
- Real time dark and deep web search
- Identify relationships and key patterns
- Use advanced filters to cut out the noise

Ready to get started?

Instant Threat Report

Get a free, instant Close Digital Protection threat report that will create a snapshot of your digital footprint in a single report.

Instant Close Digital Protection threat reports are generated by thousands of open and closed data sources, including social media, deep web, as well as the dark web. Check out some of our sources below:

Our team of trusted associates includes highly qualified investigators, intelligence analysts, psychologists, educators, legal practitioners, and other professionals, all of whom maintain the highest standards of integrity.
